

CP-2GM Constant Pressure Calibration Cylinder

Transport
Canada

The Welker CP-2GM Constant Pressure Calibration Cylinder is the most effective solution for containing and maintaining calibration standards. Our cylinder provides safety, reliability, and convenience to calibration standards used in laboratories world wide.

FEATURES

- Proven safety in cylinder design
- Maintains the integrity of the calibration standard
- Internal Gravity Mixer™
- Visual capacity magnetic indicator
- DOT and Transport Canada* approved for transportation
- Manufactured with over 40 years of industry-leading expertise

BENEFITS

- Provides maximum degree of confidence in the integrity of the calibration standard
- Utilizes complete volume of the standard before returning to the calibration standard manufacturer
- Internal Gravity Mixer™ provides a proper sample mix for accurate lab analysis
- Easy to handle
- Requires minimal storage space in laboratory
- Compact design makes shipping cost-effective

SPECIFICATIONS

CP-2GM Constant Pressure Calibration Cylinder

CP-2GM

Materials of Construction	316/316L Stainless Steel
Seal Material	Kalrez®
	Viton®
Operating Pressure	1800 psig MAOP @ -20 °F to 120 °F
Sample Inlet Connections	¼" FNPT
Sample Outlet Connections	¼" FNPT
Cylinder Volume	1000 cc
Cylinder Mixer Type	Gravity Mixer™
Cylinder Accessories	Rupture Disc, Reliefs, Valves, and Gauges
Transport Approvals	DOT-SP 7657
	Transport Canada SU 4781*
Industry Standards	Complies with API 8.1, API 14.1, ASTM D1265, ASTM D3700, ASTM D4057, GPA 2166, GPA 2174, ISO 3170, ISO 4257, and ISO 10715
