

PLUNGER BARS

Heath provides the utility industry with the most rugged and reliable tool you can find for all your underground probing needs. Heath Plunger Bars are specially designed to outperform all others. Heath Plunger Bars have a fitted piston rod for maximum safety and dependability, as well as a unique piston action for easy removal of the rod.

Ideal for all applications:

- Test holes probe gas leaks
- Use for preliminary pinpointing
- Locate underground structures
- ➡ Sub-soil determination tracing ledge, etc.
- ➡ Tree feeding directly fertilize roots

Features:

- Tough, one-man probing tools that easily drive 1/2-in. holes to depths of up to 40 inches.
- → Two models: Heavy Duty or Utility
- Plastic-coated handles are insulated and provides up to 10,000 volts shock resistance at the top 18" of handle. Laboratory tested.
- Tempered steel rods come in two sizes: 40" probe depth 52" probe depth
- Penetrate through even the most dense soil.

- Plastisol Overcoating

Thick layer which provides high visibility and shock/vibration/ damage protection.

Nylon Thermal Plastic

Thick layer which provides electrical insulation.

Steel Handle Assembly

Handles are rated against electrical shock protection of 10,000 volts.
