

Mobile Kits

Heath's mobile kits are available for purchase to use with the Detecto-Paks. The main components of a Detecto-Pak mobile systems are:

Detecto-Pak Units - DP4 & DP-IR (available separately)

A gas detector is mounted at a suitable point inside the vehicle. This unit may be powered by the vehicle electrical system by means of a cable/plug which is included in the mobile unit installation kit.

Sample System

Two or more rubber cones hanging down from the bumper about 1½" - 2" from the pavement, to sample the atmosphere as close to the surface of the ground as possible. This system picks up a continuous sample at the surface of the ground at points selected by the driver, and conveys it by means of tygon tubing to the Gast pump.

Gast Pump (aka: sample pump or secondary pump)

A self-lubricating electric pump that is mounted inside the vehicle, usually under the hood, but sometimes either inside the vehicle or in the rear.

DP4® & DP-IR™

4-Cone Mobile - Part No. 102316-1

6-Cone Mobile - Part No. 102331-0
